To Whom It May Concern,

Skyline Design purchased and received a Casso-Solar Technologies Batch Lamination System which has been in consistent use in our facility since 2017. We utilize the system to produce a variety of decorative EVA laminated products for our customers.

Our overall experience with both the equipment and Casso-Solar in general has been very positive. Casso-Solar personnel are always responsive to our needs and their support has been a great asset to the operation of the lamination oven.

We highly recommend Casso-Solar Technologies for quality, USA-made lamination equipment.

Sincerely,

David Wildfield

Managing Director
