Subject: Testimonial – Tristar Glass

Dear Derek:

I am pleased to provide this testimonial regarding the quality and performance of our new Casso-Solar drying ovens for our spandrel glass lines. As you know, Tristar Glass recently purchased and installed two of your ovens, one dedicated to drying ceramic frit and the other for drying both ceramic frit and ICD's Opaci-Coat 300 spandrel product.

It was a pleasure working with a US-based equipment manufacturer. Casso-Solar's communication was outstanding, ensuring a seamless process from order to installation.

Replacing in-service equipment can be challenging, but Casso-Solar's ability to customize their designs to fit our existing infrastructure (e.g., power drop and exhaust stack locations) eliminated transition concerns and ensured a smooth installation, saving both time and money. For both dryers, the old equipment was removed, new equipment installed, and production was back up and running within the same week. It truly felt as if we were all part of a single team working towards the same goal.

Tristar Glass highly recommends Casso-Solar Technologies for their high-quality, US-made paint drying equipment, technical expertise, and exceptional customer service.

Sincerely,
Tristar Glass, Inc.
